CORE SKILLS

WAYS OF WORKING

Self-directed · Owns tasks end to end ·
Adapts to existing codebases and
conventions · Ships with minimal
oversight

FRONTEND

React · Next.js · TypeScript · JavaScript

AI & LLM

LangGraph · OpenAI APIs · Anthropic
Claude · Autonomous agents · Agent
orchestration · Multi-agent
architectures · Tool / function calling ·
RAG · Prompt engineering

BACKEND & APIS

Python · FastAPI · Django REST ·
Node.js · REST · GraphQL · SQLAlchemy ·
Event-driven microservices

AWS & INFRA

Lambda · AppSync · Cognito · API
Gateway · IaC: CloudFormation / SAM ·
S3 · DynamoDB · SQS · Docker

DATA

PostgreSQL · Redis · MySQL

DELIVERY & OBSERVABILITY

GitHub Actions · Jenkins · Prometheus ·
Grafana · pytest · Jest

EDUCATION

Computer Engineering

Instituto Tecnológico de Costa Rica
(TEC)
2009–2015

Graduation Project: iTalent (Google
Partner)

LANGUAGES

Spanish — Native

English — Professional Working · C1

PROFESSIONAL SUMMARY

Self-directed senior full-stack engineer with **11+ years** shipping production software and owning delivery from system design through release, with minimal oversight.

Full-stack across **Python** and **React / TypeScript** on **AWS** — Lambda, AppSync (GraphQL), Cognito, and API Gateway — using **SQLAlchemy**, PostgreSQL, and infrastructure as code in **CloudFormation / SAM**.

Build and manage autonomous **LangGraph / OpenAI agents** with orchestration, RAG, prompt engineering, and tool calling, pairing model calls with deterministic logic where reliability matters.

PROFESSIONAL EXPERIENCE

Senior Full-Stack Engineer

LA VIEJA ADVENTURES · **CURRENT**

APR 2026 – PRESENT

REMOTE · COSTA RICA

- Own a cloud-native operations platform end to end — customer booking plus internal tools for reservations, scheduling, and fulfillment — shipping from architecture through deployment with minimal oversight.
- Build on Python (FastAPI / Django REST) and React / TypeScript on AWS serverless, with autonomous LangGraph / OpenAI agents for reservations and reporting.

Cloud Software Engineer

EXQ2 · CLIENT: MIDLAND CREDIT MANAGEMENT

OCT 2025 – APR 2026

COSTA RICA

- Delivered a cloud-based payment control and management platform for client MCM — dropped into the client's existing repository, picked up its conventions, and owned the data model, REST APIs, and UI on a fast release cadence with minimal oversight.
- Built Python (FastAPI) services and a React / TypeScript front end on AWS serverless — Lambda, API Gateway, AppSync (GraphQL), Cognito — with infrastructure as code in CloudFormation / SAM and SQLAlchemy over PostgreSQL.
- Took features from initial ask to shipped solution independently, pairing with the client team through code review.

Senior Software Engineer

WIND RIVER

SEPT 2024 – OCT

2025

REMOTE · COSTA RICA

- Contributed to event-driven microservices across AWS and Kubernetes, plus React / Redux dashboards with real-time visualization for operational monitoring.
- Worked independently inside an established codebase — picked up its conventions quickly, owned features end to end, and contributed heavily to code review.
- Strengthened CI/CD (GitHub Actions, Jenkins) and observability (Prometheus, Grafana).

Full-Stack Engineer

COSTA RICA SOFTWARE SERVICES (CRSS)

SEPT 2022 – JUN 2024

COSTA RICA

- Built full-stack web apps with React front ends — including Kaptyn, a luxury ride-hailing platform — and RESTful APIs over PostgreSQL / MySQL for GPS tracking, payments, and real-time mobility.

Software Engineer

INTEL · VIA INFOSYS / AMSTEK

FEB 2021 – MAY 2022

COSTA RICA

- Built Python and Node.js REST APIs and backend integrations for a chemical management system, in a client-facing engineering capacity through Infosys.

Software Development Engineer I

MICROVENTION · TERUMO

2016 – FEB 2020

COSTA RICA

- Built Python and Java systems for FDA-regulated medical-device manufacturing and automated production reporting under ISO 13485 quality controls.
